Main Skills

Summary

Enthusiastic and highly motivated **Fullstack Software Developer**. Experienced in all stages of the development cycle for web projects from graphic design and features development to deployment and maintaining of cloud server infrastructure.

I would describe myself as flexible, responsible, open-minded, and willing to learn. I'm able to be entirely self-sufficient, however I am enthusiastic about being a part of a team, learning from stronger team members and helping others to grow.

Skills

Well-versed in a rich set of tools from programming languages (ex. **JavaScript, TypeScript, C#**), front-end and back-end technologies (**React, Node.js, ASP.NET**), markup and styling languages (**HTML, CSS, SASS**), databases (**MySQL, MS SQL, MongoDB**) to source control (**Git, GitHub, GitLab**), CI/CD (**Jenkins, Github Actions**), static code analysers (**SonarQube**) and cloud platforms (**AWS, DigitalOcean**).

Experience

Transition Group Software Engineer
May 2022 - Present
Yerevan, Armenia

I have been working on Data Analytics and Business Intelligence web solutions based on .Net+React, the main job of which was to transform client market/research data through ETL process to then deliver insights into complex data with different reporting engines.

Responsibilities:

- Resolving defects
- Developing new features
- Integrating products with other solutions and cloud services

Freelance Web Developer
September 2020 - May 2022

As a freelancer I have been creating landing pages, personal blogs, and other websites for various clients (ex. music bands, artists, fitness trainers) with custom-made content management systems.

Responsibilities:

- Graphic Design
- Implementation of front-end and back-end sides
- Deployment and product support

Education

Bachelor of Computer Science:

Computer Science and Software Engineering – 2024
Belarusian State University of Informatics and Radioelectronics, Minsk

Bachelor of Music:

Performing Arts - 2019
Belarusian State Academy of Music, Minsk
